EVERYTHING POSSIBLE FOR YOUR UNIQUE KITCHEN.

THE ENTRY INTO PREMIUM CLASS

Chef 850 combines the features, robustness and performance of the System 850 appliances with precisely matching substructure bases in HS quality, therefore the range is of single (vertical) modularity.

Depth: 850 mm

SMD **THC** **HS**

MAXIMUM FLEXIBILITY OF THE HIGHEST QUALITY

The System 700 and System 850 series have a unique range of appliances for limitless combinations. Utilising the Double Modular Design the substructure bases can be independent of the upper appliance, manufactured with the highest H3 hygiene standard. Also available as double service solution.

Depth System 700: 700 mm

CHEF 850

SYSTEM 700

SYSTEM 850

TOP PERFORMANCE FOR GASTRONOMY AND CATERING

Ultimate performance appliances combined with robust frame construction, double modular design available. System 900 is the solution for the greatest of challenges. A complete range of electric, gas or steam heated appliances that offer maximum flexibility for the most demanding kitchen facilities. Also available in cantilevered version.

Depth: 920 mm

With their modern technology, the multifunctional appliances also support low-temperature and night cooking, therefore ensuring excellent results with high energy efficiency.

- AFC** Ambach Frame Construction
- OSS** Omega Sandwich Structure of the One Piece Top

- EC** Electronic Control
- HS** Hygiene Standard (base units in H3)
- H3** Hygiene Standard base units on entry level
- Available option**

INNOVATION MAKES THE DIFFERENCE.

"DOUBLE MODULAR DESIGN"

DMD

Double flexibility, design the base modules independently from the upper appliance.

"SINGLE MODULAR DESIGN"

SMD

The base units correspond exactly to the dimensions of the appliances. Full high modules are always combined.

OMEGA SANDWICH STRUCTURE

OSS

The multi-layer structure with omega profiles gives the One Piece Top maximum stability and durability.

TRUE HYGIENIC CONNECTION

THC

The ultimate hygienic connection for the perfect modular design. The engineered locking fork corresponds exactly to the appliance, locking them together via the conical wheels and providing a watertight join.

AMBACH FRAME CONSTRUCTION

AFC

The robust, self-supporting frame construction gives maximum stability and durability.

ELECTRONIC CONTROL: FULL TRANSPARENCY FOR AMBACH KITCHEN 4.0

EC

Reduce operating costs, optimize processes, relieve the staff.

The modern electronic control panel is very robust and suitable for almost all electronic devices.

THERMOBLOCK 2.0

Thermoblocks are a special Ambach solution where the heating elements are embedded into aluminium. Thanks to the excellent heat transmission properties of Aluminium this innovation allows excellent temperature distribution on the cooking surface and improves durability of the heating element.

EXCLUSIVITY

Ambach allows you to create a kitchen perfectly in sync with your style and personality. Choose from our range of metallic finishes and bespoke detailing: Speciality knobs, handles, trim, handrails and pot-racks, complimented by colours from the full RAL spectrum.

Ambach is the perfect choice for open kitchens. The "Exclusive Range" and "Minimal Design" finishes transform standard cooking blocks into true masterpieces, making them absolute protagonists of all kitchens, especially those on view to the diners. These special versions offer materials and finishes of absolute excellence to give the chef a unique, and impressive stage to showcase their work and talent.
